Educational and Clinical Resources
Winter 2021
The Society of Critical Care Medicine's (SCCM) educational opportunities and practice resources are designed with the entire multiprofessional critical care team in mind, equipping practitioners with the tools needed to provide quality care to all critically ill and injured patients. With many resources offering continuing medical education (CME)/continuing education (CE) or maintenance of certification (MOC) credits, SCCM offers a variety of options to accommodate your goals, schedule, and learning style.

Our Promise
We promise to provide exceptional learning experiences, a vibrant community, and essential tools that make you successful in improving the quality of patient care.

eBooks
A number of SCCM's print publications are also offered as eBooks, available through the SCCM Online Store and Amazon. These eBooks are compatible with Kindle, Nook, iPad, and other eReaders. Look for throughout the catalog for publications available in electronic format.

Online Learning
SCCM offers various online learning opportunities via self-directed or On Demand courses so that you can learn at your own pace from the comfort and convenience of your home or office.

With an On Demand course, you gain access to videos containing both slides and lectures from a live course in a searchable format. Once you have purchased an On Demand course, you can access the materials as often as you like by logging in to mysccm.org.

Self-directed courses contain interactive learning modules as well as pre- and posttests to assess your knowledge. Continuing education credit is also available. Once you have purchased a self-directed course, you can access the materials by logging in to mysccm.org.

The Society of Critical Care Medicine, SCCM, and Critical Care Congress are registered trademarks of the Society of Critical Care Medicine.

The critical care community has made an incredible impact on the world. We are looking forward to recognizing these key accomplishments, as well as the opportunity to reconnect with our members, colleagues, and friends at the Society of Critical Care Medicine’s (SCCM) 51st Critical Care Congress.

Take advantage of these opportunities at the largest multiprofessional critical care event of the year:

- **Collaborate** with members of the entire multiprofessional team to solve complex challenges and remove barriers to improving care
- Engage in **hands-on workshops** and interactive debates hosted by renowned faculty from around the globe
- Explore the **latest technologies** and tools from more than 100 exhibitors that are changing the way we work

Registration opens summer 2021 at sccm.org/congress

Save the Date!

We look forward to gathering together again.

SCCM is constantly developing resources and compiling the latest information to help intensivists and nonintensivists respond to novel coronavirus disease 2019 (COVID-19). Visit sccm.org/disaster to learn more.

With educational content including practice guidelines, journal articles, webcasts, and online courses, the disaster resource page will connect you with the education, knowledge, and opportunities to be prepared during the COVID-19 pandemic.

Critical care clinicians are encouraged to visit the Rapid Resource Center through the disaster web page to find bite-sized information on COVID-19 sorted by topic and content type.

Non-ICU clinicians can take advantage of free online critical care training through SCCM's Critical Care for Non-ICU Clinicians. This compilation of critical care resources includes core critical care education for nonintensivists who may need to treat COVID-19 patients. Visit sccm.org/covid19 to learn more. This free educational content will be available for a limited time.

The disaster resource web page also offers resources for healthcare professionals to connect with one another—to find and give support and share information during the pandemic. Consider checking out one of the discussions at community.sccm.org.

**To access the resources, visit sccm.org/disaster**

On Demand

49th Critical Care Congress

Critical Care Congress On Demand 2020
Experience the educational content from SCCM’s 49th Critical Care Congress from the comfort and convenience of your home or office. Congress On Demand provides access to hundreds of individual presentations drawn from the concurrent, joint, and plenary educational sessions, as well as the symposia, at the 2020 Critical Care Congress in Orlando, Florida, USA. Videos are provided in a searchable format, making it the next best thing to attending the live event. On Demand also includes Star Research presentations, which highlight the top 64 abstracts submitted, and access to the Virtual Poster Hall, which allows users to search and view abstracts and review enhanced abstract information. Once you have purchased Congress On Demand, you can access the materials as often as you like by logging in to mysccm.org.

There are more than 115 hours of programming on the following topics:

- Administration
- Cardiovascular and Resuscitation
- Endocrine and Renal
- Ethics and End of Life
- Gastrointestinal and Nutrition
- Hematology and Immunology
- Infectious Diseases
- Neuroscience
- Pediatrics
- Pharmacology and Sedation
- Professional Development
- Pulmonary
- Quality and Patient Safety
- Sepsis
- Surgery and Trauma

What Critical Care Clinicians Need to Know About Vaping: Addressing Real-Life Cases With a CDC Overview

This webcast addresses the vaping crisis in the United States by helping clinicians better diagnose and manage this difficult patient population. It also includes a U.S. Centers for Disease Control and Prevention (CDC) overview of the current data and science regarding vaping as detailed by a CDC representative.

Purchase Now

It Takes a Village: How a Care Team Manages a Patient Crisis due to Vaping

This webcast educates critical care professionals about the vaping crisis in the United States and includes a multidisciplinary panel discussion using an interview style to discuss real-life cases, current vaping data, and studies and communication strategies to use when addressing vaping with patients, parents, and caregivers.

Purchase Now

Coding and Documentation Update for Critical Care Services

This webcast discusses the definitions and required elements for critical care and emergency medicine services and also describes coding and documentation for procedures and use of appropriate modifiers related to critical care.

On Demand

Implementation Science: Bringing Evidence to the Bedside
Stay up to date on critical care research methods by expanding your understanding of the emerging field of implementation science during this new On Demand webcast by Discovery, the Critical Care Research Network. Expert faculty introduce implementation science methods and illustrate how these methods can enhance the development of evidence-based critical care practice.

BILLING20OD
Complimentary | $35 | $40 | $45

NEW

Billing and Documentation Update 2020 On Demand
A primer in billing and documentation for critical care services, this On Demand webcast touches on key recommendations for appropriate billing and supportive documentation for all critical care providers, including physicians and advanced practice providers. Expert faculty discuss various aspects of billing and documentation during the COVID-19 pandemic, including tele-health.

BILLING20OD
Complimentary | $35 | $40 | $45

NEW

Causal Inference From Observational Data
Continue your critical care research education with this stimulating On Demand webcast highlighting the key steps involved in conducting rigorous observational critical care research. Learn from expert faculty as they cover hot topics including an introduction to the potential outcomes framework and how it can be used to design an observational study, common sources of bias, and strategies to control confounding.

DISCWEB20COD
Complimentary | $35 | $40 | $45

NEW

Models of Translational Research in Critical Care
In this exciting On Demand webcast by Discovery, the Critical Care Research Network, experts discuss the unique ethical challenges that have implications for study design and execution due to the life-threatening nature of the conditions being studied and urgency of rapid treatment initiation. Dive deeper into these challenges and learn about key best practices when conducting translational research.

Critical Care Coding and Billing On Demand
Experience the educational content from SCCM’s 47th Critical Care Congress precourse, Coding and Billing, from the comfort and convenience of your home or office. This course addresses the continuing changes in coding and billing. Topics include evaluation and management coding and documentation, critical care coding, procedures and modifiers, how documentation plays a key role in supporting medical necessity for critical care services, and coding case studies.

Product Code: CODE18OD
Complimentary | $230 | $260 | $270

Critical Care Quality Summit On Demand
Experience the educational content from SCCM’s 48th Critical Care Congress precourse, Critical Care Quality Summit, from the comfort and convenience of your home or office. Critical Care Quality Summit On Demand is focused on peer-to-peer learning and explores hot topics in critical care patient safety and quality. The program aims to assess findings from the Critical Care Societies Collaborative National Summit on Clinician Burnout and discuss the 2018 Clinical Practice Guidelines for the Prevention and Management of Pain, Agitation/Sedation, Delirium, Immobility, and Sleep Disruption (PADIS) in Adult Patients in the ICU.

Product Code: QUALITY_19OD
Complimentary | $250 | $280 | $295

Self-Directed COVID-19: What’s Next
Ensure that you are equipped with the latest information and clinical knowledge as the virus continues to spread. View the educational sessions and presentations from the live event from the convenience of your home or office, including plenary lectures by Anthony S. Fauci, MD, and ADM. Brett P. Giroir, MD. Earn CE/CME credit while learning from the experts!

Product Code: COVID19ON
$88 | $88 | $88 | $88
Self-Directed Critical Care Echocardiography

Experience the educational content from the Critical Care Echocardiography Review Course, held in partnership between the Society of Critical Care Medicine and the American Society of Echocardiography, from the comfort of your home or office. The self-directed course features videos and slides from individual presentations at the live course, as well as a Q&A session to test your knowledge on critical care echocardiography. Videos of every session are provided in a searchable format, so you can access the entire program as if you were there. Physicians, nurses, and physician assistants can receive 23 hours of continuing education credit.

This course will assist in preparation for the National Board of Echocardiography examination offered at domestic and international sites.

- ECHOREV19ON
- $940 | $1,000 | $1,120 | $1,180

Visit the sccm.org/onlinece for numerous complimentary CE/CME offerings as well as additional resources for purchase.

---

Self-Directed Multiprofessional Critical Care Review Course: Adult

Experience the sessions from the live course at your own pace.

- Access over 17 different critical care content areas
- Review all lectures through interactive learning modules
- Explore sample board review questions, answers, and rationales
- Assess your knowledge through the use of pre-and posttests

Physicians, nurses, and pharmacists are eligible to receive 38 hours of continuing education credit. Maintenance of certification credit is also available. CE/CME and MOC expires on November 30, 2021.

- MCCRCA20ON
- $780 | $825 | $925 | $975

Self-Directed Pediatric Fundamental Critical Care Support
Self-Directed Pediatric Fundamental Critical Care Support (PFCCS) provides a relaxed learning experience with access to the same didactic sessions found in the live version of the third edition PFCCS course. Learn at your own pace from the comfort and convenience of your home or office and then assess your knowledge through the use of pre- and posttests.

Price: $200 | $215 | $240 | $250

Visit the sccm.org/onlinece for numerous complimentary CE/CME offerings as well as additional resources for purchase.
Self-Directed Virtual Critical Care Rounds I: Adult
Self-Directed Virtual Critical Care Rounds (VCCR) I: Adult is designed for students rotating through the intensive care unit. It provides a relaxed learning experience with access to the same didactic sessions found in the online director-led version of the VCCR I: Adult course. Learners cover materials at their own pace from the comfort and convenience of their homes or offices and then assess their knowledge through the use of pre- and posttests. Self-Directed VCCR I: Adult includes 18 interactive learning modules, each containing learning objectives, case studies, clinically focused questions, and a list of additional resources for further exploration.

![VCCR](image.png)

Self-Directed Virtual Critical Care Rounds II: Adult
Self-Directed Virtual Critical Care Rounds (VCCR) II: Adult is designed for residents and fellows rotating through the intensive care unit. It provides a relaxed learning experience with access to the same didactic sessions found in the online director-led version of the VCCR II: Adult course. Learners cover materials at their own pace from the comfort and convenience of their homes or offices and then assess their knowledge through the use of pre- and posttests. Self-Directed VCCR II: Adult includes 19 interactive learning modules, each containing learning objectives, case studies, clinically focused questions, and a list of additional resources for further exploration.

![VCCR](image.png)

Self-Directed Virtual Critical Care Rounds I: Pediatric
Self-Directed Virtual Critical Care Rounds (VCCR) I: Pediatric is designed for students rotating through the pediatric intensive care unit. It provides a relaxed learning experience with access to the same didactic sessions found in the online director-led version of the VCCR I: Pediatric course. Learners cover materials at their own pace from the comfort and convenience of their homes or offices and then assess their knowledge through the use of pre- and posttests. Self-Directed VCCR I: Pediatric includes 8 interactive learning modules, each containing learning objectives, case studies, clinically focused questions, and a list of additional resources for further exploration.

![VCCR Pediatric](image.png)

Self-Directed Virtual Critical Care Rounds II: Pediatric
Virtual Critical Care Rounds (VCCR) II: Pediatric is designed for program directors of residents and fellows rotating through the pediatric intensive care unit. This course includes 13 narrated modules, each containing learning objectives, case studies, interactive questions, and a list of additional resources for further exploration. Students use a state-of-the-art online learning management system to complete the lecture portion of the course, and pre- and posttests ensure their mastery of the educational content. Course directors and coordinators can monitor the progress of participants in real time through their personalized administrative dashboard.

![VCCR Pediatric](image.png)
SCCM’s growing list of hosted training courses provide the perfect learning experience to bring consistent and uniform education across an organization. Most courses combine dynamic presentations with skill stations for a thorough learning experience.

Contact the Licensing Team at licensing@sccm.org or +1 847 827-6888 to learn more and start planning your course today!

Visit sccm.org/licensing to learn more about SCCM’s licensed courses and view the full list of current and upcoming courses.

**Fundamental Critical Care Support**

Each year, more than 10,000 clinicians across five continents receive Fundamental Critical Care Support (FCCS®) training, which prepares nonintensivists to manage critically ill and injured patients for the first 24 hours until transfer or appropriate critical care consultation can be secured.

The sixth edition curriculum emphasizes case-based education and integrates scenarios that mirror clinical reality. The FCCS course is available in English, Spanish, Japanese, Portuguese, Simplified Chinese, and Traditional Chinese.

**Pediatric Fundamental Critical Care Support**

Pediatric Fundamental Critical Care Support (PFCCS) focuses exclusively on essential concepts for healthcare professionals who may be involved in the initial management and transfer of critically ill or injured pediatric patients.

The third edition of this course reflects the latest research and most effective training approaches in pediatric critical care. The PFCCS course is available in English.

**Fundamental Critical Care Support: Obstetrics**

Fundamental Critical Care Support: Obstetrics is designed for intensivists and nonintensivists who may provide maternal/fetal critical care and for clinicians in obstetrics seeking additional education in critical care.

Course content covers physiologic changes during pregnancy, specific obstetric medical conditions and appropriate treatment, maternal cardiovascular resuscitation, and airway management of critically ill pregnant patients, as well as appropriate steps in fetal assessment, delivery, and neonatal management. The FCCS: Obstetrics course is available in English and Spanish.
Critical Care Ultrasound

FCCS: Resource Limited
Designed for healthcare professionals who may encounter critically ill or injured patients in resource-limited environments, FCCS: Resource Limited addresses the unique challenges faced when resources are limited and the impact these limitations have on providing critical care. Participants will learn about managing resource limitations, resource allocation, triage, and ethical implications.

Learn more >

FDM
Fundamental Disaster Management
Fundamental Disaster Management prepares healthcare professionals to treat victims of natural or man-made mass casualty events. It arms critical care professionals with the expertise to manage the initial response to large-scale disasters.

In the third edition, special emphasis is given to critical care handling of an inpatient surge in a disaster’s aftermath. The FDM course is available in English.

Learn more >

Critical Care Ultrasound

Critical Care Ultrasound: Adult

Critical Care Ultrasound: Pediatric and Neonatal

Advanced Critical Care Ultrasound: Adult

Bring the realistic training needed to perform point-of-care ultrasound to your institution with any of SCCM’s three critical care ultrasound courses. Participants will demonstrate a foundation of ultrasound knowledge, practice acquisition of high-quality images via hands-on exercises, and demonstrate image interpretation and utilization of ultrasound as a diagnostic tool.

Learn more >

Critical Care Review

Multiprofessional Critical Care Review Course: Adult
(for the international audience)

Bring the comprehensive knowledge of the Multiprofessional Critical Care Review Course: Adult to your institution. Designed for practitioners who are seeking a review and update on critical care, this intense three-day learning experience will provide participants the most comprehensive field overview on the diagnosis, monitoring, and management of critically ill patients. Participants benefit from high-quality programming and study materials and accurate assessments of critical care knowledge.

Hosted Training Courses

ICU Liberation

ICU Liberation
Educate and train healthcare professionals on patient management strategies through the ICU Liberation course. Using the ICU Liberation Bundle (A-F), the course covers practical applications of the latest pain, agitation/sedation, delirium, immobility, and sleep disruption guidelines for ICU care.

New Licensed Courses Coming Soon

Current Concepts in Adult Critical Care
Learn about clinical challenges and obtain the latest information on problems encountered in critically ill patients with Current Concepts courses.

A sample of topics from the Current Concepts in Adult Critical Care course includes:

- Mechanical Ventilation
- Sepsis Recognition
- Glycemic Control
- Telemedicine

Current Concepts in Pediatric Critical Care
Enhance and update your critical care knowledge with the latest clinical information relevant to patients in the ICU.

A few of the offerings from the Current Concepts in Pediatric Critical Care course include:

- Postoperative Management After Cardiac Surgery
- Neuroprotective Strategies
- Hemodynamic Monitoring
- Procedural Sedation

Contact the Licensing Team at Licensing@sccm.org or +1 847 827-6888 for more information.

Current Concepts in Adult Critical Care

This comprehensive book focuses on compelling challenges immediately pertinent to the critical care practitioner. Highlights of this newly expanded edition include:

- Mechanical Ventilation
- Weaning Steroids in the Critically Ill
- Volume Management in the Critically Ill

* : CCACC-2020 | : ECCACC-2020
- : $90 | : $95 | : $105 | : $110

Self-Assessment in Adult Multiprofessional Critical Care, Eighth Edition

The eighth edition of Self-Assessment in Adult Multiprofessional Critical Care offers hundreds of multiple-choice study questions designed for anyone preparing for board certification or maintenance of certification or to refresh and expand your overall knowledge of critical care medicine. Developed by leading experts in critical care, this self-assessment covers the top 20 critical care focus areas. Questions are based on real-world case studies, and an answer key helps you measure your progress.

* : SAMCCB | : ESAMCCB
- : $225 | : $240 | : $265 | : $280

Current Concepts in Pediatric Critical Care

Look to this edition of Current Concepts in Pediatric Critical Care for the latest information on problems encountered in the pediatric patient. Highlights of this newly expanded edition include:

- Preventing Healthcare-Acquired Harm in the Pediatric ICU
- Neuroprotective Strategies
- Mass Transfusion
- Difficult Airway Management
- Plus 10 bonus chapters

* : CCPCC-2020 | : ECCPCC-2020
- : $90 | : $95 | : $105 | : $110

Fundamental Critical Care Support: Resource Limited

Fundamental Critical Care Support (FCCS): Resource Limited is designed for multiprofessional clinicians who may encounter critically ill or injured patients in austere and operational environments. FCCS: Resource Limited addresses the unique challenges faced when resources are limited and the impact these limitations have on providing critical care. The book and course curriculum also emphasize the unique injuries and illnesses associated with armed conflict, such as burns, blasts, and polytrauma, as well as injuries and illnesses in such areas as tropical diseases, neurology, coronary syndromes, pediatrics, and obstetrics that are often encountered in resource-limited settings. Delivery of care is presented in a manner that is specific to managing resource limitations, resource allocation, triage, and ethical implications of these environments.

Purchase Print Book | Purchase eBook

Fundamental Disaster Management, Third Edition

Fundamental Disaster Management, Third Edition, offers specific knowledge and skills necessary to provide appropriate patient care in a mass casualty event. The text includes a comprehensive discussion of global and specific concerns, focusing on how to care for patients once they arrive at the hospital. It is a valuable resource for hospital, agency, and community disaster readiness planning. The FDM textbook is available in English.

Purchase Print Book | Purchase eBook

Fundamental Critical Care Support: Tropical Diseases

Fundamental Critical Care Support: Tropical Diseases prepares healthcare professionals to care for patients infected with tropical diseases. Covering topics ranging from chikungunya virus disease to Zika virus infection, this textbook covers the transmission, symptoms, management, and prevention of such diseases. It is a valuable resource to anyone who may provide care in affected regions. The FCCS: Tropical Diseases book is available in English.

Mechanical Ventilation: Essentials for Current Adult and Pediatric Practice

Mechanical Ventilation: Essentials for Current Adult and Pediatric Practice highlights new practices in managing critically ill patients, both adult and pediatric, who require mechanical ventilation. Clinicians will find discussions on both populations valuable, regardless of their specialty. The publication focuses on specific diseases and disorders and emphasizes clinical applicability of data, discussions, and recommendations that clinicians can use at the bedside.

Preparing Your ICU for Disaster Response

Disaster strikes—Is your ICU prepared? Preparing Your ICU for Disaster Response serves as a step-by-step guide to help ICU professionals assess their current level of disaster preparedness. It provides information to help align your ICU response within an institutional disaster preparedness plan, as well as tips for how to translate this plan to accommodate your specific resource needs in the event of a critical care surge. Presented in an easy-to-follow format, this toolkit provides practical, usable resources for strategizing and implementing a standing plan for disaster preparedness.

Available as an eBook only.

Coping and Billing for Critical Care: A Practice Tool, Seventh Edition

A must-have text for professional coders, hospital administrators, physicians, nurse practitioners, and physician assistants, Coding and Billing for Critical Care: A Practice Tool, Seventh Edition, explains the complexities of critical care coding and billing and offers an enhanced understanding of coding and billing procedures in the critical care setting. This edition includes updated CPT® codes along with new chapters on Evaluation and Management Services, National Coding Initiative, and Establishing Compliance.

Integrating Advanced Practice Providers Into the ICU, Second Edition

As the roles of advanced practice providers (APPs) in the intensive care unit (ICU) expand, so does the need to promote their proper and optimal utilization as members of the critical care team. Integrating Advanced Practice Providers Into the ICU, Second Edition, provides APPs, administrators, intensivists, and others with vital information and resources for optimizing APPs as integral members of the multiprofessional ICU team. Topics include staffing models, billing, credentialing, developing orientation programs, metrics, professional development, and much more.

Critical Care Medicine

*Critical Care Medicine (CCM)* is the premier peer-reviewed, scientific publication in critical care. Directed toward specialists who treat patients in the intensive or critical care unit, *CCM* covers all aspects of acute and emergency care for the critically ill or injured patient.

Select and Professional level members receive a free subscription to *CCM* as one of the many benefits of membership.

Pediatric Critical Care Medicine

*Pediatric Critical Care Medicine (PCCM)* is the first scientific peer-reviewed journal to focus exclusively on pediatric critical care and critical care neonatology. It includes sections on pediatric cardiac intensive care and neurocritical care and also features translations of selected abstracts every other month in the online edition.

Pediatrics Section members receive *PCCM* as part of their section dues. Visit sccm.org/join to join the Pediatrics Section.

Critical Care Explorations

*Critical Care Explorations (CCE)*—now available on PubMed Central—is an online, open-access journal covering all aspects of critical care. *CCE* rapidly disseminates new ideas, stimulates innovations, and has a wide-ranging scope, including traditional article types and time-sensitive information about quality and safety, methodological and technical advances, healthcare economics, advances in predictive modeling, and the impact of new studies on evidence-based practice.
Get Tuned into iCritical Care

iCritical Care podcasts offer a wide selection of in-depth interviews on adult and pediatric topics. Customize your listening experience with the below subscription options.

- **The All-Audio feed** includes iCritical Care podcasts on all topics from both recent and archived releases.
- **Critical Care Medicine** podcasts spotlight interviews with authors from SCCM’s premier peer-reviewed, scientific publication in critical care.
- **LearnICU** iCritical Care podcasts share interviews with thought leaders on select topics.
- **Pediatric Critical Care Medicine** podcasts feature interviews with authors from SCCM’s leading pediatric journal.

Fundamentals Pediatric Book Bundle
Gain a comprehensive understanding of providing critical care to pregnant patients and pediatric patients with the Fundamentals Pediatric Book Bundle. This bundle includes print versions of the *Fundamental Critical Care Support: Obstetrics* and *Pediatric Fundamental Critical Care Support* textbooks. With the book bundle, readers are able to learn the basics of critical care and expand into the unique challenges of providing critical care in areas with resource limitations and transport delays.

**Fundamentals Resource Limited Book Bundle**
Enhance your critical care knowledge with the Fundamentals Resource Limited Book Bundle. This new bundle includes the *Fundamental Critical Care Support*, Sixth Edition, and *Fundamental Critical Care Support: Resource Limited* textbooks. With the book bundle, readers are able to learn the basics of critical care and expand into the unique challenges of providing critical care in areas with resource limitations and transport delays.

**Fundamentals Obstetrics Book Bundle**
The Fundamentals Obstetrics Book Bundle includes the *Fundamental Critical Care Support*, Sixth Edition, and *Fundamental Critical Care Support: Obstetrics* textbooks. By purchasing both textbooks together, learners are able to build core critical care knowledge and expand into the specifics of providing care to the critically ill or injured pregnant patient.

Virtual Clinical Campus
LearnICU transforms the comprehensive clinical resources of the Society of Critical Care Medicine into a virtual campus of clinical knowledge. Divided into 24 distinct topic areas, this convenient portal allows users to quickly discover and access critical resources that enhance patient care.

Available Instantly
The library never closes and is accessible from a variety of devices. LearnICU’s clinical knowledge base is available 24 hours a day. Because the site can be accessed using a smartphone or tablet, it’s also available wherever you have a connection to the Internet.

Collaborative and Collegial
LearnICU combines the flow of clinical information with social tools that allow clinicians to share and collaborate with one another. Each knowledge area is overseen by an expert who facilitates discussion and curates contributions. Participants can also share content with their own social networks via integration with Facebook and Twitter.

Enhanced for Members
SCCM members have access to enhanced content and the complete library of knowledge, including guidelines, archived presentations from SCCM’s live events, select book chapters, and all articles from Critical Care Medicine and Pediatric Critical Care Medicine expertly indexed to the proper knowledge area.

Visit LearnICU.org and Log In to See All the Available Resources.
Award Winning ICU Designs: How to Build a Better Facility for Patients and Caregivers (2021)

Functional ICU design is crucial to delivering quality critical care. To honor the best examples of such design, an annual awards program is cosponsored by the Society of Critical Care Medicine, the American Association of Critical-Care Nurses, and the American Institute of Architects Academy of Architecture for Health. This interactive web-based program contains the top projects since 1992, with each project reviewed in short video segments. The companion PDF contains features and floor plans of each winning unit. This product provides a complete, contemporary resource for creating a facility that fulfills the needs of both ICU patients and caregivers.

The 2021 product has been expanded to include winners of the new COVID-19 ICU Design Citation Award.

Complimentary product

Patient Communicator App

The Patient Communicator App by SCCM is designed to improve communication among patients, families, and caregivers. With translations in 18 languages; a diary feature; options to easily communicate about pain, moods, and needs; a glossary of terms; and other educational materials for patients and families, the Patient Communicator App can help ease the stress of a hospital stay.

Features include:
- A new diary function that allows patients to track their daily progress during and after a hospital stay
- Translation capabilities that allow for two-way communication in 18 languages on a variety of topics, such as pain, basic needs, feelings, and moods
- A scale that allows patients to identify where on the body they feel sensations of pain, itching, and nausea and express the intensity of these sensations
- More than 30 translatable phrases that allow patients to express various needs related to their care and well-being
- A glossary of terms to help educate patients and families about the intensive care unit
- A free download of the booklet Understanding Your ICU Stay: Information for Patients and Families

Download the app or recommend it to patients and families in your ICU. The app is available for iPhone and Android. For more information and to download the app, visit sccm.org/PatientCommunicator.

ICU Management
Virtual Critical Care Rounds (VCCR) is designed to better prepare students, residents, and fellows for their intensive care unit (ICU) rounds. Each course includes interactive learning modules with learning objectives, case studies, clinically focused questions, and a list of additional resources for further exploration.

Program Director-Led Virtual Critical Care Rounds I: Adult
VCCR I focuses on the **student level** and includes 18 modules:
- Advanced Cardiovascular Life Support and Rapid Response Team
- Airway Assessment and Management
- Antibiotics in the ICU
- Arrhythmias
- Basic Mechanical Ventilation
- Critical Care Aspects of Hepatic Failure
- Critical Care for Older Adults
- Electrolytes
- Healthcare-Associated Infections in the ICU
- ICU Orientation
- Immediate Management of Burn Injuries
- Medical Errors
- Organ Donation
- Palliative Care in the ICU: An Integrated Approach
- Pharmacology and Pharmacokinetics
- Shock
- Transfusion Medicine in the ICU
- Trauma

**VCCRAI21**
$520 | $555 | $620 | $650

Program Director-Led Virtual Critical Care Rounds II: Adult
VCCR II focuses on the **resident and fellow levels** and includes 19 modules:
- Acid-Base Balance Disorders
- Acute Kidney Injury in the ICU
- Arrhythmias in the ICU
- Assessing Fluid Balance in the ICU
- Basic Mechanical Ventilation 1
- Cardiogenic Shock
- Endocrine Emergencies
- Ethics in the ICU
- Hemorrhagic Shock
- ICU Delirium
- Infections in Critically Ill Patients and Appropriate Antimicrobial Selection
- Management of Bleeding Related to Antithrombotic Therapy
- Mechanical Ventilation 2
- Neurologic Emergencies
- Nutrition Therapy and Stress Ulcer Prophylaxis
- Pain, Agitation, and Delirium Management in Adult ICU Patients
- Sepsis and Septic Shock
- Spinal Cord Emergencies
- Venous Thromboembolism in the ICU

**VCCRAII21**
$520 | $555 | $620 | $650
Program Director-Led Virtual Critical Care Rounds I: Pediatric

VCCR I: Pediatric focuses on the student level and includes 8 modules:
- Approach to the Child with Altered Mental Status
- Blood Gas Analysis
- Fluids and Electrolyte Emergencies in Critically Ill Children
- Mechanical Ventilation
- Pediatric Airway Management
- Pediatric Shock
- Respiratory Failure in Children
- Sedation and Analgesia
